

COMP229 – Web Application Development

Project Part 5 - Final Presentation

Due: Week 14

Value: 15%

Final Presentation

Maximum Mark: 32

Overview:

Working with your team, select one or more people to present your final web application project. It is recommended that only those most comfortable with presenting live are selected to represent your team.

Your presentation should include details contained in your external document (such as an overview of your web application, your planning process, lessons learned, and future possibilities).

Use a slide deck (MS PowerPoint or Google Slides) during your presentation to keep you organized. Your presentation should be no longer than 10 minutes (including your demonstration video).

Even though your presentation will be recorded, you must be prepared to present live if called upon to do so.

All members of your team should be prepared to answer questions about **any aspect** of your project regardless of their role or which features they helped create.

Presentation evaluation will consider your **presentation materials** (which should be appropriate for the type of site you have created), your **presentation value** (vocal presentation, knowledge of materials, professionalism) and your **Demo Video**.

Instructions :

Your presentation will have the following requirements:

Task 1: Develop a Slide Deck for your Final Presentation that contains the following slides:

- **Title Page (1 Slide):** Your presentation should include a **Title page** with your **team logo** and a screenshot of your final Web Application
- **Roles (1 slide)** - This slide must contain a mugshot of each member of your group along with

their **development role** and their **specific responsibilities** for the project.

- **Web Application Overview (1 slide)** - You will use this slide as a backdrop to summarize what your Web Application is about and which project type you chose (Survey Site, Tournament Brackets Site, Incident Management Site, or another approved Site)
- **Planning (1 or more slides)** – This section will detail your planned features. Describe why any features were **not** implemented. Discuss any challenges you had when executing your plan.
- **Instructions (1 or more slides)** – This section will describe how to access and use your site's basic features (e.g. create a survey, create a tournament, create a new incident record, etc)
- **Site Demo (1 slide)** – Create one slide that reads “**Site Demo**”. You will use that slide to signal that you will begin a live demonstration. During your **demonstration**, you will **showcase** your Site's functionality. Each main component and feature of your site should be highlighted (e.g. Authentication, Database Access, Responsive UI, Contact form, Survey Creation, Tournament Creation, Ticket Creation, etc.). You should attempt to visit most pages on your site.
- **Team Retrospective (1 slide)** – Discuss the challenges your group had to overcome during development and how you would approach the game project differently if started again.
- **Future Possibilities (1 slide)** - Discuss how you would expand your game given more time for development.

Task 2: Create a Short Video presentation on **YouTube** or another streaming provider.

- You will **demonstrate** your site's functionality. You must show each page working properly
- You will **describe** the code in your app.js file that drives the functionality of your site
- Sound for your Video must at an appropriate level so that your voice may be **clearly heard**, and your screen resolution should be set so that your code and site details are **clearly visible**
- Your Short Video should run no more than 10 minutes

Task 3: Submit your working Video link to the appropriate Discussion Board on eCentennial.

SUBMITTING YOUR WORK

Your submission should include:

1. Your presentation document (MS PowerPoint) or a link to Google Slides.
2. A **link** to your demonstration video (please do not upload the full video)

This assignment is weighted **15%** of your total mark for this course.
